

Introducing VinoFile

The world's first FileMaker system for wine lovers on the iPad - for FREE!*

4th August 2010

Cordis are today releasing at no cost our brand new application **VinoFile**, designed for use on the ground breaking 'FileMaker Go' platform.

As part of Cordis' commitment to developing the most innovative, user-focussed and business friendly systems using FileMaker, we have developed VinoFile, designed for wine lovers who want to drink wine, collect wine and share those experiences with others.

VinoFile provides you with a highly usable system for storing information against your wine collection, including wine reviews, stock control, sharing with FaceBook, complimenting food notes and organising your 'Wine Friends'.

Produced by one of the UK's Leading FileMaker Developers

VinoFile

Managing your wine.

VinoFile takes the power of FileMaker Go and combines that with an application that organises something a lot of us enjoy, wine.

VinoFile has been designed to manage your wine collection, allowing you to keep track of what you drink, how much stock you hold for it, who you drank your wines with and what you thought about each wine.

Cordis strongly believes in the business potential with the FileMaker Go platform, and decided to use VinoFile as the perfect application to demonstrate the possibilities of this new technology, and at the same time allow users to have fun and get some extra value out of their iPad and iPhone devices.

"VinoFile is a great system for everyone who enjoys wine and has a collection of any size at home, from a few bottles to a few hundred bottles. We developed this system because we wanted to let people explore FileMaker Go by managing information that they find interesting, engaging and well suited to an immersive browsing device such as the iPad or iPhone." commented Daniel Box, Managing Director - Cordis.

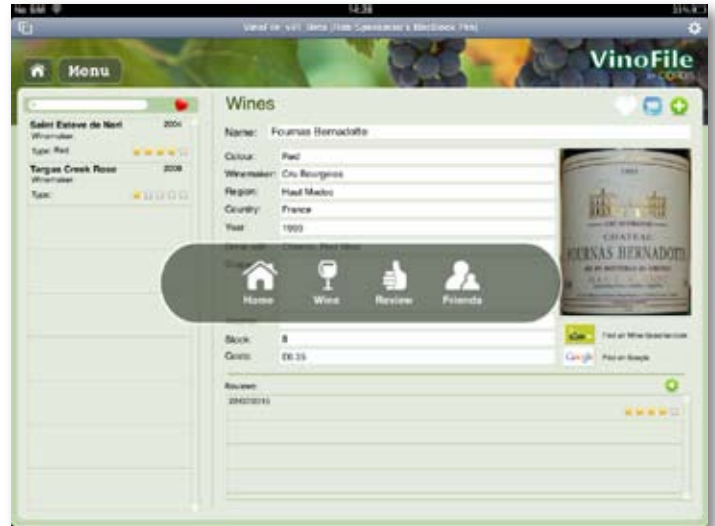

How can I get a copy of VinoFile?

Cordis are offering copies of VinoFile at no cost for a strictly limited period. All you need is a copy of FileMaker Go. If you'd like a copy of VinoFile, contact us directly on;
